### SKILLS

#### TECHNICAL

- Artificial Intelligence (AI), Deep Learning & Machine Learning (ML) techniques
- Generative AI (GenAI)
- Large Language Models (LLM)
- Predictive & Descriptive Analytics
- Neural Networks
- Computer Vision
- Business Intelligence (BI)
- Data Segmentation
- Logistic Regression

#### FUNCTIONAL

- Project Management and Team Handling
- Business Development and Intellectual Property (IP) development
- Mentoring juniors. Experienced technical trainer and coach

#### DATA SCIENCE & ANALYTICS TOOLS

- Python
- Big Data (Hadoop / Hive / PySpark)
- Tableau / Power BI / Looker
- SAS Enterprise Guide
- SAS Enterprise Miner (EMiner)
- SQL
- Amazon Web Services (AWS)
- C, C++, Visual Basic, VBA, Git / Github
- Microsoft Office(Excel, PowerPoint, Access, Word)

### ACHIEVEMENTS

- Excellent delivery record at top consulting firms
- IIT-JEE (2002) AIR: 1854
- Regional Mathematical Olympiad, Delhi, 1999 – Rank Holder
- Various Academic Excellence Awards – College & School

### WORK EXPERIENCE SUMMARY

#### Senior Director | Tiger Analytics – Analytics Consulting

April 2023 (~ 2+ Years)

- Managed analytics accounts exceeding \$6M across multiple sectors like **QSR, retail, telecom, media, manufacturing and real estate**.
- Spearheaded a team of 40+ associates.
- Led projects leveraging **Large Language Models (LLMs)** for **Major US QSR** Flutter app development and for **Major US Retailer** to generate descriptions for SKUs for the website.

#### Director | Axtria – Decision Science

June 2020 (~ 3 Years)

- Oversaw delivery for a \$8M analytics engagement with a **global life sciences firm**.
- Managed 50+ associates across oncology and pharma analytics workstreams.

#### Senior Manager | Accenture – Digital – Financial Services Applied Intelligence

January 2011 (~ 9.5 Years)

- For a **Global Top Payments Network Provider**, led multiple teams across Cobrand & Merchant, Loyalty, Econometrics and SB & Commercial. Delivered **80+ projects leveraging SAS, Hadoop/Hive, Python and Micro-strategy**.
- For a **Top European Bank**, led COE supporting the bank with Data Modeling across various product portfolios including **Credit Cards, Mortgage and Loans**.
- For a **US Digital Bank** for their lending business portfolio, developed data mart using **PySpark** for the multitude of dimensions involved in acquiring, processing and servicing a loan. Built **tableau dashboard** to monitor portfolio performance in near real time.
- For banking and broader Financial Services clients, **leveraged external third-party vendors' data** to give **comprehensive 360 view** of prospects for acquisition, cross-sell and other use cases.
- For a **Top Irish Bank**, did **Web Analytics project**
- Certified Trainer**: As a training team member, conducted training sessions (annually) on SAS, Python, Hadoop, Hive and Advanced Data Modeling Techniques

#### Assistant Manager | Inductis (later Decision Analytics, EXL Service)

July 2005 (~ 5.5 Years)

- Worked for a **Large US based Wealth Management** client to improve Prospect Acquisition by Integrating External Data, Participant & Plan Tenure Prediction Modeling, Prospects Segmentation, Prospect Database De-Duping
- For a **Large UK Insurance Company**, worked onshore on Capacity & Resource Management Project. Built Operational Forecasting models for Claims department for handling inbound calls. Used time series forecasting and regression techniques. Improved FTEs scheduling by running various simulations.
- Worked with a **US Insurer's marketing analytics team** to do extensive analysis of different lines of business to see opportunities of cross-selling across LOBs.
- For a **Top 5 US Airlines**, did Form of Payment Analysis (FOP simulation); built Corporate Portfolio Dashboard using VB; and TMCs & Corporate Incentive Pricing Tool
- Certified Trainer**: As a training team member, conducted training sessions (annually) on SAS, Visual Basic (VB), VBA and Advanced Data Modeling Techniques

### EDUCATION

**Bachelor of Engineering, University of Delhi, Delhi College of Engineering, Delhi, India (now Delhi Technological University (DTU))**

August 2001 – June 2005

## PAYMENTS

## 1. US Business of Global Top Payments Network Provider

- i. Led multiple teams from offshore supporting clients US business including Cobrand & Merchant, Loyalty, Econometrics and SB & Commercial. Worked directly with multiple client's stakeholders for 3+ years.
- ii. Provided support to other teams within client engagement including Risk Analytics & BI
- iii. Helped generate multi-million revenues for Accenture and the client.
- iv. Responsible for project management, client management, delivery of projects. Managed team of 10+ consultants.
- v. Closely worked with Accenture MDs on business development activities like avenues for data monetization, analytics as service and automation.
- vi. Was involved hands-on work using SAS, Hadoop/Hive, Python and Micro-strategy tools as well as training other resources in the team and beyond.
- vii. Completed 80+ projects including Feeder Market Analysis, Campaign Benchmarking, Destination Analysis, Automation of repeat processes in Python and Hive, etc.
- viii. Received excellent annual appraisal and appreciation from the leadership for the work done across multiple years

## 2. US Business of Global Acquirer/ Merchant Data Provider / ATM Provider

- i. Worked with leadership on developing strategy for leveraging client's data for data monetization – thus selling products and services to their B2B customers.

## BANKING

## 1. Top European Bank – Offshore Center of Excellence

- i. Delivery Lead (Senior Manager) for a team of 15 managers and consultants – supporting the bank with Data Modeling across various product portfolios like Credit Cards, Mortgage, Loans, etc.
- ii. Responsible for the innovation agenda for the client during the year. Drove the model automation effort – saving total 35% model development time.
- iii. Drove the Segmentation 2.0 for the bank for Life-stage and Attitudinal Segments. Received exceptional praise from client. Client also got coverage in the media for the work done and received local analytics industry award for innovative work done.
- iv. Drove the platform migration to enable more open-source tools available for advanced machine learning techniques.

## 2. US based Digital Bank

- i. Led two teams for the lending business portfolio - which was yet to be launched by the client in few months
- ii. **Data Mart (Customer Analytics Record – CAR):** Built the data mart by processing and analyzing Big Data (Customer, Application, Credit History, Adobe Clickstream, and Client Call Center Interactions & Servicing) and created new features / variables that would be useful for day-to-day analyses and tracking purposes. Developed data mart for the multitude of dimensions involved in acquiring, processing and servicing a loan using PySpark (Python implementation of Spark).
- iii. **Visualizations in Tableau:** Built the dashboard for the client showing the KPIs. The dashboard was linked to the CAR data mart described above and was used to monitor portfolio performance in near real time.

## 3. Business Development for Digital Signals Financial Services Offering

- i. For banking and broader Financial Services clients, led the business development for Accenture's Digital Signals offering. The offering leveraged External vendor's data to give comprehensive 360 view of prospects for acquisition and cross-sell.
- ii. Role included engaging with various local teams across the globe, understanding the clients' requirements and customizing the solution per their needs.
- iii. Assessed data vendors across various geographies including US, Canada, Australia, multiple countries in Asia, LATAM & Middle-East

## 4. Web Analytics for a Top Ireland Bank

- i. For the personal banking website of the bank, did various analyses including sales funnel analysis, service funnel analysis, created web activity segments
- ii. Did page level analysis which included exit page analysis, abort page analysis, page sequence analysis, top transactions types analysis, day and time level analysis

## DOMAIN

### WEALTH MANAGEMENT & INVESTMENTS

## WORK EXPERIENCE DETAILS

1. **Worked with a Large US based Wealth Management Company on multiple projects**
  - i. **Improved Prospect Acquisition by Integrating External Data:** Checked viability of external vendors' data append on model performance and enriching the existing Lead Management data. Developed prospects segmentation model for identifying the prospect with high likelihood of conversion using firmographic and historical data.
  - ii. **Participant Prediction Modeling:** Predicted missing customer variables, involving enhanced analytical techniques like decision trees and Logistic Regression.
  - iii. **Plan Tenure Prediction Modeling:** Modeled missing tenure variable using historical data. The techniques deployed included decision trees, Discriminant Analysis and Multi-Dimensional Scaling.
  - iv. **Prospects Segmentation:** Segmentation of the prospects that have higher probability to be in the market and to be client look-alikes.
  - v. **Prospect Database De-Duping:** Developed rules for de-duping the records in the Lead Management tables.
2. **Top UK Insurance Company – Multiple Analyses on Pensions Data**
  - i. Led a team and did opportunity sizing for win-back strategy for Pensions consolidation
  - ii. Pensions data mining exercise on transfer-outs to identify critical regions, prioritize contact strategy and define the 'Preparing for Retirement' market
  - iii. Pensions transfer outs hypothesis testing – challenging/proving business assertions
  - iv. Nominated Retirement Age – descriptive analysis and hypothesis testing to understand customer behavior approaching their retirement

### INSURANCE

1. **Large UK Insurance Company – onshore on Capacity & Resource Management Project**
  - i. Built Operational Forecasting models for Claims department for handling inbound calls. Used time series forecasting and regression techniques. Got significant improvement over the existing models.
  - ii. Improved FTEs scheduling by running various simulations – by sliding shift; changing shift lengths/start-stop time; and adding/removing FTEs/PTEs. Got better scheduling curve fit between the outputs from Operational Forecasting Team and the FTEs/PTEs available on the day of the call.
2. **US Insurance Client – onsite engagement in Marketing Analytics team**
  - i. Worked closely with marketing leaders to prepare metrics to see the behavior of different segments of insurance producers in the market.
  - ii. **Cross-sell Analysis:** Did an extensive analysis of different lines of business (LOB) to see the opportunity of cross-selling across LOBs.
  - iii. Consolidated data from three Lines of Business and different sources in order to facilitate future data pulls more efficiently and effectively. Maintained other databases.
  - iv. **Expanding client relationship:** Started alone on the project and have been able to successfully win the trust of this new client which helped in project expansion.
3. **Top US Insurer – Consumer Classification**
  - i. Led a team of 4 consultants and developed consumer classification model that classifies consumers of auto insurance into needs-based segments based on their demographic characteristics
  - ii. Advanced analytics techniques deployed - Ensemble Modeling
4. **US based P&C Insurance Company – onsite engagement**
  - i. Led a team and built Cross-Sell Timing Model to predict the best timing to cross-sell products to the exiting pool of customers. Streamlined the reporting process for multiple lines-of-business including Claims Finance and Personal Insurance.

### MANUFACTURING

1. **Large US Swimming Pools Equipment Manufacturer**
  - i. Addressable Market Analysis:
    - Leveraged external vendor's data to augment internal data in order to understand the US swimming pools market.
    - Segmented the market into various buckets of high, medium and low penetration as well as based on dealers to pool ratio.
    - Recommended cross-selling products with above average penetration. Recommended increasing sales team and dealers' network in markets with poor penetration

## DOMAIN

### AIRLINES

## WORK EXPERIENCE DETAILS

### 1. Top 5 US Airlines – Multiple Projects with partial onsite presence

- i. **Form of Payment Analysis (FOP simulation):** Created a simulation model for seeing the effect of switching between different forms of payment (like different credit card providers) on net savings.
- ii. **Corporate Portfolio Dashboard:** Created a dashboard in Microsoft Access and VB for automating the generation of PowerPoint and Excel monthly reports like Portfolio Analysis, Airline Hub Reports, Custom Reports, Ad-hoc Data Query reports etc.; thus making the reporting process fast, efficient, consistent and less error prone.
- iii. **TMCs & Corporate Incentive Pricing Tool:** Led a team of two analysts and developed a tool in Microsoft Access, Microsoft Excel and VB. The tool aims at globally streamlining the process of providing the front-end and back-end incentives to the TMCs and B2B customers. The role also included project & team management, and client communication.

### TELECOM

### 1. US Telecom Client – Tower Analysis

- The client was a full-service wireless carrier providing a strong, reliable network supported by latest technology and wide range of communication services.
- Objective was to understand the effects of adding new tower(s) on subscribers' usage behavior, experience and ripple effects on customers' journey
- Data sourced included Tower Demographics (location, coverage, population, etc.) and Usage and Experience details (calls, SMS, internet data usage at subscriber level; call & SMS drop rate, Subscriber status – active/suspended, etc.)
- Churn Model was built to determine effects of using new tower on Churn Propensity. Also, pre-post analysis was done on Target & Control groups.
- Noticeable changes were observed in usage behavior and quality of service for subscribers using new tower(s)

### LIFE SCIENCES / PHARMA

### 1. Large US Life Sciences Company – Offshore Delivery Lead

- i. Offshore delivery and team management. Leading team of 50+ associates across levels
- ii. Solutioning and managing multiple oncology and pharma workstreams
- iii. Training & ramping up the resources on the new AI/ML & Big Data technologies and life sciences domain & processes.
- iv. Role includes Onshore / offshore coordination, monthly governance connects, weekly stakeholder discussions, managing staffing & attrition
- v. **NLP Project:** Client wanted to analyze Medical Science Liaisons (MSLs) call notes pertaining to its various brands. MSL call feedback could also be used to gather customer insights and sentiments to facilitate the MSL and HCP interaction, ultimately leading to better patient outcomes. Natural Language Processing (NLP), Text mining and sentiment analysis was used to gain insights to analyze free-form text.

### QUICK SERVICE RESTAURANT (QSR) 1. Generative AI (Gen AI) Chatbot

- Top international fast-food chain with 7K+ stores in US and Canada
- Built AI chatbot to empower the executives with quick access to critical business data & KPIs using natural language querying
- Data sourced from BigQuery containing multiple tables like sales, customer feedback, product data, customer data, etc. Indexed known good SQL queries to reduce computational complexity and improve query reliability
- Constructed prompts using Retrieval Augmented Generation (RAG). Generated SQL queries using Gemini Pro (LLM).
- Accuracy of >90%. Achieved latency of < 15s.

### ORGANIZATION DEVELOPMENT

### 1. Text Mining - Data Standardization & De-duping Offering

- i. **US Address Standardization:** Developed rules for standardizing US postal addresses according to USPS standards.
- ii. **Name Standardization:** The contact names (first and last names) and business names were standardized.
- iii. **Data De-duplication:** Looked at the various patterns in the data, the de-duping rules were applied and duplicate score was assigned to each record in the database.

### 2. Certified Trainer

- i. Delivered training sessions (annually) on Python, Hadoop, Hive, SAS, Visual Basic (VB), VBA and Advanced Data Modeling Techniques

## ACHIEVEMENTS

### PROFESSIONAL

## DETAILS

- Received Axtria's ACE Team award (Best Project Team) for 2021
- Received annual appraisal ratings in Top 2 tiers consecutively for four years at Accenture [2013 – 2016]
- Received Beats Expectations rating [4 out of 5] in five consecutive years [2005 – 2010 review cycles] at Inductis
- Year 2006 Inductis GM Services Award - First Prize and Year 2007 Inductis GM Awards – Special Recognition [The award is aimed at recognizing the effort that goes into building and managing a client relationship]
- Received Inductis Employee of the Quarter Award – Quarter 1, 2008

### ACADEMIC

- Merit Certificate & Scholarship for the Academic Year 2002 - 2003 (2nd Year)
- Selected in Indian Institute of Technology (IIT), Delhi for Bachelor of Technology, 2002 [IITJEE All India Rank (AIR) - 1854]
- Science Open Merit Test, Delhi State Teachers' Forum Regd., 1999 – 18th Rank
- Regional Mathematical Olympiad, Delhi, 1999 – 35th Rank
- Awards of Academic Excellence at School Level
- Awards of Excellence in Art and Painting competitions at National Level.
- 1st Prize in Atelier, National Level, (AutoCAD Designing Contest), INNOVA 2005, DCE Technical Festival, 2005
- 2nd Prize in Atelier, National Level, (AutoCAD Designing Contest), MACH 2004, DCE Technical Festival, 2004
